## EMOTIONS BASIS

In everyday [life](#) we use our anatomical [body](#) parts to [do](#) some functions and on the basis of those functions some have [been](#) assigned as cultural and spiritual significance. For example our [brain](#) is associated with [mind](#) which is not a anatomical part but a spiritual part of [human body](#) , similarly [heart](#) is also associated with emotions which directly affect the muscles function like fear , dare and coward so [heart](#) is associated with most of emotions but [muscle](#) is associated with emotions which require [action](#) .

Devils and demons are often described as having characters of [an animal](#) that is they have big nails , big horns , tails , big [teeth](#) and their skin is often rough and rugged.

## Compound postural ideograms

### Posture + posture

### Posture + named objects

## Posture + abstract objects

# Compound Biological Ideograms

[compound biological ideograms](#)

# Compound Elements Ideograms

[Compound element ideograms](#)
