HUMAN CYTOLOGY 3

HUMAN CYTOLOGY

- 3d cell
- speaking cells
- Cell [eukaryotes + prokaryotes] = nucleus +/- organelles +/- cell Membrane
- Prokaryotic cell = eukaryotic cell - nucleus
 - bacteria
- non cellular life
- virus

* Types of cell

- 1.cuboidal
- 2.columnar
- 3.squamous
- 4.air filled cells
- 5.fat filled cells
- 6.glucose
- 7.big cell or cell size increases in hypertrophy
- 8.atrophic cell
- resident cells
 - fibroblasts (fiber producing cells)
 - adipocytes
 - macrophages
 - mast cells
 - pigmented cells
 - adult stem cells
- wandering cells
 - lymphocytes
 - plasma cells
 - granulocytes
 - neutrophils
 - eosinophils
 - basophils
 - monocytes
