Idea Particles

Idea particles are the fundamental radicals used while writing the characters it can be written in a reduced form or in its original form.

We can use the analogy of writing the vowels in hindi , so we have main vowels A(अ) , i (इ) , u(उ) and when writing them we don't actually use the original vowels but simply use their indicators or so called reduced forms , Just as in case of K (क) + i (इ) = कि (ki) and similarly in [mantrakshar](#) when we use [eye](#) + [water](#) = tears /cry

character 1	character 2	combined character
