MANTRAKSHAR SCRIPT

This [script](#) is written in [analogy](#) with the Devanagari [script](#) of Sanskrit. Except here all these are the alternate Consonants of Devanagari alphabets.

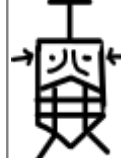

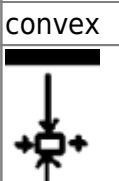

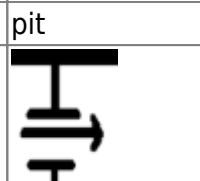

The first point to remember while drawing a [mantrakshar](#) character is to start with a skyline which is followed by a central soul line and finally it meets its end at the [earth](#) line. These are the main characters from which we take the semantic quantity of that character to [join](#) them with other characters for forming compound ideograms.
